TASK MANAGER MOBILE  
APPLICATION

# INTRODUCTIONS

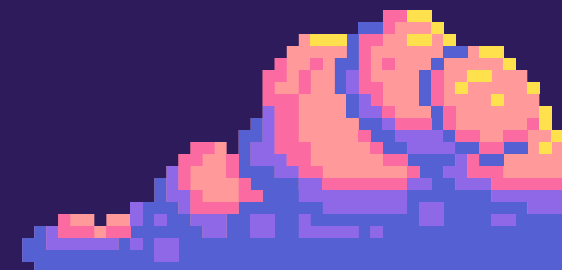

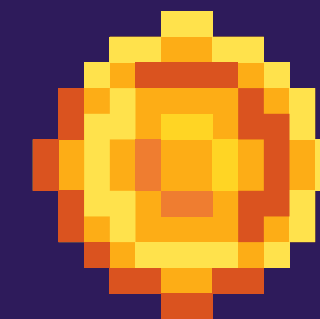

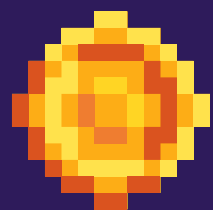

**Introduces "ABCUniTasks," a task management application with a user-friendly interface comprising two primary screens: Dashboard and Tasks. The Dashboard offers navigation options, while the Tasks screen provides a comprehensive view of tasks, allowing users to add, view, and delete tasks seamlessly. Central to this functionality is the TaskProvider class, utilizing the ChangeNotifier mechanism for efficient state management. Through the Provider package, the application ensures responsive updates, enabling users to effortlessly manage tasks within an elegant and visually appealing environment.**
